SUEZ INVESTING \$600,000 IN LOCAL WATER INFRASTRUCTURE

Improvements in Toms River Will Enhance Service Reliability and Water Quality

SUEZ officials announced that work will begin the week of April 1, 2019 on a water infrastructure improvement project within the Township of Toms River to replace 2,400 feet of aging water main. The company's replacement of infrastructure on Bay Breeze Drive, Cattus Street, Longman Street and Sea Breeze Drive is a top priority in providing its residential customers with safe and reliable water service.

"While small water systems across the country often lack the resources needed to maintain reliable service, SUEZ is taking a proactive approach. These upgrades will help ensure that our customers will be served by a system that provides exceptional water quality and will continue to be reliable for many years to come," said Jim Mastrokalos, Director of Operations.

Mastrokalos added that these capital improvements are a continuation of a local \$4.5 million water main upgrade program. SUEZ will replace about 2,400 feet of 8-inch ductile iron water pipe, add two fire hydrants and renew approximately 50 water services through about May 2019, weather permitting. The company will conduct work weekdays from 7 AM through 5 PM and Saturdays from 9 AM through 4 PM.

The company expects brief, temporary, service interruptions while work occurs. Customers will be alerted in advance regarding specific dates and times when temporary water shut offs will occur.

Mastrokalos noted that SUEZ will work with Toms River officials during the Township's own construction project in the same neighborhoods.

Final restoration, including pavement for all of the projects, is expected to be completed by June 2019.

About SUEZ in North America

SUEZ in North America operates across all 50 states and Canada with 3,260 employees dedicated to environmental sustainability and smart and sustainable resource management. The company provides drinking water, wastewater and waste collection service to 6.4 million people on a daily basis; treats over 600 million gallons of water and over 450 million gallons of wastewater each day; delivers water treatment and advanced network solutions to 16,000 industrial and municipal sites; processes 55,000 tons of waste for recycling; rehabilitates and maintains water assets for more than 4,000 municipal and industrial customers; and manages \$4.1 billion in total assets. The company posted revenues of \$1.064 billion in 2017 and is a subsidiary of Paris-based SUEZ.

SUEZ

With 90 000 people on the five continents, SUEZ is a world leader in smart and sustainable resource management. We provide water and waste management solutions that enable cities and industries optimize their resource management and strengthen their environmental and economic performances, in line with regulatory standards. To meet increasing demands to overcome resource quality and scarcity challenges, SUEZ is fully engaged in the resource revolution. With the full potential of digital technologies and innovative solutions, the Group recovers 17 million tons of waste a year, produces 3.9 million tons of secondary raw materials and 7 TWh of local renewable energy. It also secures water resources, delivering wastewater treatment services to 58 million people and reusing 882 million m³ of wastewater. SUEZ generated total revenues of 15.9 billion euros in 2017.
